MARYLAND STREAM INFORMATION EXCHANGE: Paleo to Present Streams

SAVE THE DATE: DECEMBER 12th, 2014

Exchange will be held at
the Anne Arundel
Community College
Florestano Lecture Hall,
Arnold MD.

[http://www.dnr.maryland.gov/ccs/
MDStreamExchange.asp](http://www.dnr.maryland.gov/ccs/MDStreamExchange.asp)

Please join your fellow Natural Resource professionals for a dialogue about the ecology and geomorphology of Piedmont and Coastal Plain streams. The goal of the one day exchange is to provide natural resource planners, scientists, and other environmental professionals with a better understanding of past and present stream conditions and functions. We do not intend to focus on particular restoration techniques or conservation strategies. Instead, we plan to discuss the potential for preserving and/or re-establishing the ecosystem services provided by our freshwater streams.
